SECURITY TECHNOLOGY

CONSULTING SERVICES

Even the most experienced security professional sometimes feels lost navigating today's complex security technology landscape. How do you adequately prepare your organization's security technology so that it can withstand an array of shifting and unpredictable threats? Many find the safest route is to partner with an experienced guide.

THE SOLUTION?

At Sentinel, we draw on decades of expertise to help security professionals leverage technology to create secure environments.

Plan > Design > Deploy > Manage, our holistic, four-step methodology, covers every aspect of security technology services, ensuring our clients feel confident and in control of their security technology program.

Whether you need a comprehensive solution or targeted help at any stage of your journey, Sentinel's expert team is ready to support your specific needs while always keeping the bigger picture in mind.

Introducing
**Sentinel's
Security Technology**
Consulting Services

Engage us to provide any or all of these services:

- **PLAN:** Development of a security technology plan based on your organization's objectives, code compliance, best practices and current security risks, leveraging the most effective tools and technologies.

- **DESIGN:** Detailed, actionable designs based on your security requirements, including drawings, specifications and RFP documentation for implementing a security technology project.

- **DEPLOY:** Includes procurement process management with vendor analysis, construction administration with field inspections and project close-out. A higher tier service adds extensive project management services, including coordination of all trade contractors and deliverables.

- **MANAGE:** Program Management keeps technology optimized for peak performance over time, operators fully trained and vulnerabilities identified and addressed proactively before incidents occur.

Benefits of Our Holistic Approach

Designing a physical security technology project with a holistic mindset ensures that each system effectively addresses a full range of potential risks, optimizes your organization's resources and supports the creation of a cohesive and robust security environment.

- Maximize opportunities for synergistic, integrated, multi-system solutions
- Simplify system management through compatible technology platforms
- Choose scalable and adaptable solutions with a long technology lifecycle
- Preserve the use of legacy systems and devices that can still deliver value
- Map a strategic migration path for replacing end-of-life systems
- Consider how security technologies will impact the daily experience of employees, visitors and other stakeholders
- Support better coordinated incident response efforts
- Ensure operators are trained on your systems' full features and capabilities
- Reduce opportunities for human error

Engage our complete services sequence, **Plan > Design > Deploy > Manage,** for the convenience of one-stop that handles all aspects of your security technology projects. Our full accountability ensures that your projects proceed smoothly and efficiently, with seamless transitions between each step.

No need for comprehensive services? We're happy to contract with clients for specific projects phases.

Why Sentinel?

Our industry-leading experience sets Sentinel apart. We are a full-service consulting firm with industry experts in security management, law enforcement, emergency services and technology.
